**Shipping Import Defaults**

Import File Definition:

Folder for Shipping Import: C:\Temp\worldshic

Import File Extension: CSV

Import File Delimiter: Comma ,

Import File Has Header:

Field Mapping:

Name	Import Field	
SalesOrderNumber	1	
TrackingID	4	<input checked="" type="checkbox"/> Update Tracking Numbers from Shipping
Weight	3	<input checked="" type="checkbox"/> Update Invoice Weight from Shipping
Freight	2	<input checked="" type="checkbox"/> Update Invoice Freight from Shipping Charges
Ship Via	5	<input checked="" type="checkbox"/> Update Invoice Ship Via Field from Shipping
Voided Flag	6	

Delete Files After Import:

After Import Move Files to Folder: c:\Temp\ups\_import\imported

Buttons: Accept, Cancel

The folder where the shipping software exports information: PLW ABC 1/30/2007

For customers that prefer to use UPS Worldship or Fed Ex Ship Manager, this **ASI Addition** speeds up shipping through Sage MAS 90 software. No longer does the customer have to enter tracking numbers one-by-one. Instead, the program will match tracking numbers to the correct invoice and will, optionally, update the freight and weight for those shipments.

The key that ties everything together is the order number. Instructions are included to set up the import that will pull the order information from the Sage MAS 90 data files. The order number, stored in one of the reference fields, can then be exported automatically to a specified location. The program will read that exported data and update the invoices with the correct information. The import can be run for a batch of invoices from the menu or for one invoice at a time from Shipping Data Entry.

**Import Shipping Information**

Matched Invoices

Order No	Tracking ID	Weight	Freight	Ship/Via	Voided	Import File
