# Service Transaction Import

- Create service orders and service items
- Change the status on service orders
- Add parts to service order lines
- Transfer inventory items between warehouses

This **ASI Addition** enhances **ASI Service Center** by adding scanning devices to the process. In a high volume environment, it is extremely important to incorporate the use of scanning devices to increase speed and efficiency to the service department. This solution allows you to import transactions created by scanning devices and create service orders and service items, change the status on the service orders, add parts to the service order lines, and transfer inventory items from one warehouse to another. If you are looking to increase productivity in your service department, this solution is a must have!
